

WE ARE REVOLUTIONISING FINANCIAL INFORMATION SHARING DO YOU WANT TO BE A PART OF IT?

The Opportunity

Role: Engineering Lead

What that means: Leading the engineering effort across the Armalytix platform

The Company

At Armalytix, our mission is to build extraordinary processes to transform how firms request, prepare and process clients' financial information.

We value ability and dedication, driven by openness, collaboration and well-being. You will be a key part of the team helping to reshape and simplify the financial landscape for people - one report at a time.

Time is precious, dealing with financial forms isn't.

Your Mission

You will own and drive the strategy of the Armalytix engineering team. Aligning our engineering processes to the ambitions of the firm to ensure that we deliver a fast, intuitive and secure platform for our clients.

A bit about you

- You will be an experienced developer with a proven track record of full stack software development. You will have demonstrable experience with Java and the Spring framework.
- You will have extensive experience of developing modern, commercial grade applications using agile methodologies.
- You will be familiar with Docker/Kubernetes and cloud-based infrastructure.
- You are familiar with Open Banking and Open Finance.
- You know what 'good' looks like within an engineering team and can lead by example.
- You have a passion for continuously improving engineering process to optimise delivery to your clients.
- You understand where CI/CD fits in, and how to increase software delivery cadence the right way.
- You understand the importance of developing a quality product and understand the importance of retrospectives in the development process.
- You are familiar with Atlassian suite of Products, Jira, Bitbucket, Confluence or similar alternatives.
- You want to develop and mentor engineers at all levels in the organisation to get the best out of them and enable them to develop their careers.
- You enjoying interacting with clients, customers and staff across the company.

What it will take

- You understand security and know the risks in delivering consumer facing software.
- You understand how to architect and build scalable platforms.
- You enjoy working in a start-up where your contribution and impact makes all the difference.
- You have the ambition to take on larger roles as the company continues to grow.
- You're a great communicator who's at home interacting with clients and partners at any level.
